Work Experience:

Infosys Limited Tokyo, Japan

May 2022 – April 2025

Google Cloud Technical Engineer at Google (August 2022 – April 2025)

- Resolved over 300 GCP technical issues for customers.
- **Hands-on experience GCP services:** Cloud Run, App Engine, Compute Engine, IAM, Cloud SQL, Cloud Storage, VPN NW, DataStream, Cloud Build, Artifact Registry, Cloud Monitoring/Logging, Firebase Auth.
- Integrated Google Cloud Services (ex. Google account auth login) into a web app using Cloud Client library for Node.js.

Tech Lead/Frontend Engineer at AXA Insurance (May 2022 – August 2022)

- Used modern technologies: React.js(v17), Redux Toolkit, React Hooks, React Query, i18n, SonarQube, GitHub
- Architected a new web application, selecting suitable NPM packages.
- Managed front-end developers across offshore members.

Hays Tokyo, Japan

May 2021 – January 2022

Frontend Engineer at Asurion Japan (Contractor)

- Key technologies: React.js(v17), Redux, TypeScript, Apollo Client, GraphQL, Cypress
- Updated GraphQL queries in the existing React app to reflect recent changes in backend resolvers.

Software Engineer for React.js

- Key technologies: React.js (v15/16.8/17), Redux, React hooks, Context, React Router, JavaScript, Apollo Client, GraphQL, Chart.js, Lodash, Git, GitLab, BitBucket
- Worked on a start-up IT team with 90% coding responsibilities using Agile methodology (Scrum).
- Refactored the HyreCar owner app using React hooks and GraphQL, significantly improving component structure. After A/B testing in a few months, the new application successfully launched.

Frontend Engineer

- Key technologies: JavaScript, HTML5, CSS3, Sass, JavaScript, Gulp.js, Bootstrap 3, React.js, Angular 4
- Configured Gulp.js on my local web environment to compile Sass and minimize JS files.
- Updated banners and workout videos on an Angular-based website.
- Implemented image carousels and embedded YouTube videos on Beachbody.com homepage.

Frontend Engineer

- Key technologies: React.js, JavaScript, HTML5, CSS3, Sass, Gulp.js, Bootstrap 3, REST API
- Implemented a local weather information widget using React.js.
- Transformed existing websites from non-responsive to responsive design using Bootstrap 3.

Frontend Developer

- Key technologies: HTML5, CSS3, JavaScript, Sass, Grunt.js, Bootstrap3, PHP, MySQL, Excel VBA
- Managed Teleflora.com e-commerce site, updating products and banners for major US holidays.
- Developed an HTML generator using an Excel VBA macro.
- Developed PHP forms for sweepstakes promotion.

Web Developer

- Key technologies: HTML, CSS, JavaScript, PHP, MySQL
- Worked closely with web designers and built websites and web application for real estate industry.
- Built RSVP forms for a luxury condominium.
- Built the World Jewelry Center website in Las Vegas.

Java Web Developer (Contractor)

- Key technologies: Java (JDK 1.4), JSP, HTML, CSS, JavaScript, Apache + Tomcat, MySQL
- Worked a small IT team and built Sony's internal web applications including:
- Developed the Sony Electronics Design Center website.
- To centralize IT requests from Sony members, developed an IT helpdesk application.

Education:

Santa Monica College Santa Monica, CA

February 2004 - June 2005

Certificate of Interactive Media

- Built Flash animation-based websites.
- Developed a dummy public museum website with interactive elements.
